REINVIGORATE WITH A VIEW

As a guest of the Bodrum State Hospital you'll want to have a great time some of Turkey while you're here. In our hospital you will have the advantages of being relaxed from a stunning sea view that provides every patient with an opportunity of being relaxed.

With all that We offer our guests to combine their hospital stay with an extended visit or holiday..

A DOCTOR YOU CAN TRUST

We think that choosing the right doctor can sometimes be a formidable task, that's why we are here to help you. At Bodrum State Hospital all our doctors are highly trained. They are professional and expert in their chosen

fields. Whether you are an existing patient or considering Bodrum State Hospital for your medical treatment, professional consultation is always available, our team is always close at hand to give you the support you need. Advances in modern medical care are founded in cross-discipline collaboration.

At Bodrum State hospital, knowledge sharing and exchange between doctors is part of our culture. Combined with a flat organizational structure and the latest in medical technology, our team of doctors have all the support they need to offer the highest quality in individual care.

DEPARTMENT OF INTERNATIONAL PATIENTS

Our international patient department takes pride in looking after overseas patients and making them feel at home. If the patient decides to come to Bodrum for treatment, the international patient department will make the necessary arrangements for the patient including consultation, admission, transportation.

Once a patient has been welcomed to the hospital a full range of services are provided including translations and all daily requirements during their stay. We always accompany our patients not to make them feel alone. We have a medical coordination office staffed by medical interpreters who serve the special needs of international patients. The International Patient Department has been providing

services since it was established in 2011. We serve over 800 patients from around the world who come here for Medical treatment annually. English is widely spoken. As international patient department, we assess the medical efficacy of procedures and help patients for selecting physicians and medical staff.

PHYSICAL THERAPY AND REHABILITATION

The physical Therapy Rehabilitation at Bodrum State Hospital offers services to patients of all ages who suffer from movement dysfunction. Each patient is carefully evaluated to determine the program that the best meets his or her needs. We

are dedicated to delivering the best possible patient care. Our rehabilitation specialists are seeking innovative new ways to restore the health and function of people following illness and injury.

HYPERBARIC OXYGEN THERAPY :

Hyperbaric oxygen therapy allows you will breathe 100% pure oxygen under increased pressure. This level is much higher than the 21% oxygen found in room air. The treatment is used to treat many other diseases, including, Wounds. Hyperbaric oxygen therapy provides diabetic ulcers, radiation injury, damaged soft tissues and chronic non-healing wounds with extra oxygen to support the growth of new blood vessels that can replace those which may have been damaged.

Carbon monoxide poisoning. For individuals suffering from smoke inhalation, hyperbaric oxygen forces the toxic gasses out of the blood stream and provides extra amounts of oxygen to help damaged tissues recover more rapidly. Infections. Hyperbaric oxygen augments the body's ability to kill bacteria in wounds such as gas gangrene or bone infections.

DENTAL HEALTH CENTER

Implantation

Whether we consider our relationships, our self-confidence or our professional career, we all love to show a great smile. However, before you decide on any treatment it is worth

considering several factors: Dental treatment can sometimes be expensive, so it is worth deciding whether you're more suited to dentures or implants to avoid any unnecessary costs. Before you make your decision, it is worth considering exactly what dental implants process entails.

Bodrum State Hospital provides the most qualified doctors and dentist to work with you, evaluating all possible options and aesthetic requirements and then advising you on the most appropriate dental treatment. We offer excellent dental care performed in our modern dental clinic. Our skilled dentists provide high quality dental treatment to all patients who are looking for a better and more affordable service. Our dental surgeons are perfectionist and take great effort to ensure that everything is done correctly. The staff are attentive to every need of patients.

INFECTION CONTROL COMMITTEE

Our Infection Control Committee is supervised and reinforced by our experienced nurses specialists and medical advisers. It aims to minimize the risk of health care associated infection including VRE infection and robust infection surveillance systems. We ensure the highest quality of care and hygiene. All patients are admitted to our infection control committee and they are assessed by a special trained nurse and specialist who carry out all the necessary checks and enquire about patient's condition. When you come to our hospital, you can transfer through to your point with the minimum of entry procedure.

RABIES PREVENTION AND TREATMENT

Rabies is a preventable viral infection that attacks the nervous system. It most commonly occurs after a bite from an infected animal. Rabies symptoms can match the symptoms of many other diseases and can include fever, headache and chills.

For those who have been exposed to rabies, we give a vaccine to prevent the progressive, invariably fatal disease, rabies. In this situation, a total of four shots in the shoulder muscle: the first shot is given immediately after exposure to a rabid animal, then again 3 days later, 7 days later and 14 days later. Bodrum State Hospital is a reason for preference in rabies treatment...

Your Health is Our Priority...

Our aim is to provide outstanding private healthcare in a safe, comfortable and welcoming environment..

Promotes you to stay healthy
